COMMITMENT TO ACHIEVING NET ZERO

Llewelyn Davies is committed to achieving Net Zero emissions by 2040

BASELINE EMISSIONS FOOTPRINT

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2019

Additional Details relating to the Baseline Emissions calculations.

It is based on our financial accounting year of April-March.

Our Baseline calculation includes:

- Scope 2: Indirect Emissions
- Scope 3 Categories: 1: Purchased goods and services: 2: Capital goods: 4: Upstream transportation & distribution: 6: Business travel/Hotel stays: 7: Employee commuting/Teleworking.

Our Baseline deviates from the requirements under PPN006 as follows:

- Scope 1: Direct Emissions is not included as no gas is used in the premises and there are no company vehicles.
- Scope 3: Category 5: Waste generated in operations: is not included as office waste is minimal. Scope 3: Category 9: Downstream transportation & distribution: is not included as there is no transportation paid for by customers.
- Scope 3: Category 1: Purchased goods and services: is included, Scope 3: Category 2: Capital goods: is included, to provide a more complete Scope 3 calculation.

Baseline year emissions:

EMISSIONS	TOTAL (tCO ₂ e)		
Scope 1	0 tCO ₂ e		
Scope 2	41.8 tCO ₂ e	Scope 2 (market based)	41.8 tCO ₂ e
Scope 3 (included sources as detailed above)	38.7 tCO ₂ e		
Total Emissions	80.5 tCO ₂ e	Total Emissions (market based)	80.5 tCO ₂ e

REPORTING YEAR: APR 2024 TO MAR 2025

Total emissions have increased due to business growth. The emissions intensity by revenue has reduced from 62.5 tCO₂e/£m revenue in 2019 to 61.2 tCO₂e/£m revenue in 2025.

Baseline year emissions:			
EMISSIONS	TOTAL (tCO ₂ e)		
Scope 1	0 tCO ₂ e		
Scope 2	30.8 tCO ₂ e	Scope 2 (market based)	30.8 tCO ₂ e
Scope 3 (included sources as detailed above)	467.4 tCO ₂ e		
Total Emissions	498.2 tCO ₂ e	Total Emissions (market based)	498.2 tCO ₂ e

EMISSIONS REDUCTION TARGETS

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 38.3 tCO₂e by 2030. This is a reduction of 52.4 % compared with our baseline in 2019.

Progress against these targets can be seen in the chart below:

Chart shows Location based total

CARBON REDUCTION PROJECTS

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2019 baseline and the measures will be in effect when performing the contract.

- Travel in electric taxis whenever they are available

Future Carbon Reduction Initiatives

In the future we hope to implement further measures such as:

- Travel by economy class for short-haul flights
- Switch to renewable electricity at our premises

DECLARATION AND SIGN OFF

This Carbon Reduction Plan has been completed in accordance with PPN006 and associated guidance and reporting standard for Carbon Reduction Plans. Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Name: Rob Etchell

Position: Director
